257-159

Indice sistematico per numeri successivi del periodico

304 QC 1 L462

N. 1 1 Settembre 1985

pag.

1 UA1 Collaboration – W production properties at the CERNS SPS collider.

17 Y. E. Kim and M. Orlowski – Multiquark compound resonances and anomalous mean free path from relativistic heavy-ion collisions.

23 V. K. Joshi and M. T. Teli – On tachyon Čerenkov radiation.

29 J. Seke – On the cut-off frequency in the superradiant emission.

35 R. Battiti and M. Toller – Zero-mass normal modes in linearized Poincaré gauge theories.

40 W. I. Fushchich and W. M. Shtelen – On nonlocal transformation.

43 G. Venturi – Multidimensional cosmology.

48 A. J. Accioly – Broken-symmetry gravity theory of fourth order.

51 G. Erriu, S. Onnis, P. Randaccio, C. Gori and G. Schianchi – ESR and DSC comparative study of phase separation in μ-irradiated lipid membranes.

58 L. Cianchi and P. Moretti – On the factorization approximation of the statistical operator.

61 F. Miglietta – Prescription-independent renormalization group equations.

64 D. Neri and J. Chahoud – On an intrinsic quantal nature of statistical thermodynamics (Erratum).

N. 2 16 Settembre 1985

pag.

65 G. Cicogna and G. Gaeta – Periodic solutions from quaternionic bifurcation.

69 S.-C. Lee and S.-L. Lou – Abelian Kaluza-Klein monopoles and dyons as completely integrable systems.

73 M. Hayashi and K. Katsuura – Single-jet characteristics in $\bar{p}p \to Z^0\left(\to \sum_\nu \nu\bar{\nu}\right)+$ +jet+anything.

80 A. da Silveira – Isomorphism between matrices and quaternions.

83 G. Papini and M. Weiss – Ultrabaric relativistic superfluids.

88 M. Halilsoy – A class of transcendent solutions to Ernst system.

91 A. Jannussis and E. Skuras – Landau creation and annihilation operators and the Schrauben eigenfunctions.

99 E. F. Hefter – Single-particle model and EMC effect.

103 M. L. Rustgi, P. T. Leung and S. A. T. Long – Stopping power of neutrinos and antineutrinos in polymers.

106 D. Pavón and J. Casas-Vázquez – Carnot cycles involving black holes.

109 R. Jones – Turbulent thermal insulation of a plasma confined in a stochastic magnetic field.

pag.
111 E. Ficocelli Varracchio – New theory of the annihilation parameter for e^+-atom (molecule) systems.
116 C. Gauthier et P. Gravel – Les théories unitaires à plus de cinq dimensions et le postulat d'homogénéité spatiale.
119 S. Bhattacharyya – EMC effect: another outlook.
127 D. Vick – The Vaidya–de-Sitter metric in retarded co-ordinates.

N. 3 1 Ottobre 1985
pag.
129 S. M. Moore – A new noise-induced phase transition for optical bistability.
133 S.-C. Lee – Axially symmetric Kaluza-Klein dyons and nonlinear sigma-models.
140 E. Giannetto – A Majorana-Oppenheimer formulation of quantum electrodynamics.
145 E. Giannetto – A Majorana-Dirak–like equation for a non-Abelian gauge field.
149 Y. Koide – A schematic model of quarks and leptons with three families.
155 P. Gravel et C. Gauthier – Sur les structures géométriques de variétés de Kaluza-Klein.
159 T. Kawabe – EMC effect and hadronic gas phase.
163 V. Merlo, M. Pettini and A. Vulpiani – Anomalous diffusion of clumps in nonlinear dynamical systems.
172 A. Bonasera and M. Di Toro – Liquid-gas phase transition and compressibility of nuclear matter.
177 Ø. Grøn – Space-time inside a black hole.
179 V. Yu. Koloskov – Reference systems and co-ordinates transformations in spaces with different geometrical and topological structures.
185 M. Barilaro and A. Palumbo – Wave interaction in an electrically polarizable medium.
192 L. Ferrari and G. Russo – A pseudo–phase-transition in a one-dimensional chain (Erratum).

N. 4 16 Ottobre 1985
pag.
193 R. Delbourgo and M. Scadron – The s-d transition element and the $\Delta I = \frac{1}{2}$ rule.
199 P. Droz-Vincent – Decomposability in relativistic quantum dynamics.
203 M. C. Prati – A remarkable representation of the Lie superalgebra $osp_{(2+m|2n)}$.
209 H. Schneuwly – Do negative muons distinguish σ-electrons from π-electrons?
213 T. Egusa – $\psi(1s)$p and $\psi'(2s)$p scattering in the modified quark model.
220 A. da Silveira – Spin-two equations.
223 R. Jones – Magnetoelectrostatic confinement in RSX-II.
227 O. C. Allkofer, D. P. Bhattacharyya and J. N. Capdeville – The primary nucleon spectrum in the energy range $1 < E < 100$ TeV.
231 E. Remiddi and S. P. Sorella – Analytic value of some QED 8th-order contributions to the electron anomaly.
235 M. Hayashi and K. Katsuura – Two-proton production of heavy Higgs boson and fourth fermion generation.

pag.
241 F. Tomášek – Relation between the gravitational and the cosmological constant.
245 F. Tomášek – Methodical remark on the concept of « charge ».
249 M. Lo Savio and M. E. Olivieri – On the substrate temperature during the deposition of sprayed CdS films.
253 H. Sakuyama, N. Suzuki and K. Watanabe – Study of high-energy hadrons in EAS.

N. 5 1 Novembre 1985

pag.
257 G. L. Braglia, J. Wilhelm and R. Winkler – Calculations of electron swarm properties in N_2 at moderate values of E/N.
270 S. Sen – A statistical mechanical approach to the mass density fluctuations between 1 keV $> T >$ 1 eV in the early universe.
275 C. S. Sharma and S. Sriramkanathan – On Caianiello's maximal acceleration.
277 B. Ram and V. Kriss – Low-lying $qq\overline{qq}$ states in a relativistic model based on the Bethe-Salpeter equation.
281 K. Takayama and A. Ando – A new method for high luminosity.
289 C. Rogers and T. Ruggeri – A reciprocal Bäcklund transformation: application to a nonlinear hyperbolic model in heat conduction.
297 G. S. Tondo – The eigenvalue problem for the three-wave resonant interaction in (2 + 1) dimensions via the prolongation structure.
303 P. F. Gonzáles-Díaz and P. García-Fernández – On the atomic-state dressing effect by an intense electromagnetic radiation.
307 Th. M. El-sherbini – Geometrical model for the electron.
315 E. B. Manoukian – Dynamical generation of the time-dependent Poisson distribution for particle production. - II: Stimulated decay.
319 LiaoFu Luo and Gang Zhao – The phenomenology of $SU_{2,L} \times SU_{2,R} \times U_{1,L+R}$ gauge theory.
326 J.-F. Pascual-Sánchez – Constrained macroscopic limit of the Poincaré gauge theory of gravity.
329 Md. Salimullah and A. H. Khan – Nonlinear excitation of electrostatic waves at the difference frequency of two ion cyclotron waves in collisionless plasma.
334 C. Syros – Solutions on manifolds.

N. 6 16 Novembre 1985

pag.
337 J. C. Carvalho – On large-scale quantization.
343 R. Campanini – Quark gluon plasma and multiplicity dependence of transverse momentum in hadronic collisions.
351 K. Fujikake and S. Nishiyama – Classical aspects of the Yang-Mills equation due to its non-Abelian character.
355 K. Forinash – Additional nonperturbative contributions to pion-pion scattering.
359 S. K. Bose and U. B. Dubey – Linear invariants and the solution of a time-dependent coupled quantal oscillator.

pag.
363 C. S. Sharma – Mean values of unbounded observables in Hilbert-space quantum mechanics.
365 G. L. Braglia, J. Wilhelm and R. Winkler – Multi-term solutions of Boltzmann's equation for electrons in the real gases Ar, CH_5 and CO_2.
379 A. Motoyoshi – On the mass spectrum of the extended hadrons.
383 D. Pal and K. Kar – On the statistical theory of nuclear reactions for strongly overlapping resonances.
388 J. Hajj-Boutros and J. Sfeila – Nonstatic plane-symmetric solutions for Einstein-Maxwell equations.
393 Song Xiaotong and Dai You-shan – The scattering of lepton on the $(0\text{-}\frac{1}{2})$ electromagnetic bound system.
398 D. Dattatreya Reddy, D. Venkatapathi Raju, K. L. Narasimhan, K. Premchand, S. Bhuloka Reddy, K. Pathasaradhi and V. Lakshminarayana – Photoelectric effect around K-edges in the elements Ce, Sm, Dy and Yb.
401 A. Castellina, B. D'Ettorre Piazzoli, G. Mannocchi, P. Picchi, S. Vernetto, H. Bilokon and E. Meroni – Underground muon energy spectrum and its relevance for muon astronomy.
405 J. Seke, G. Adam and O. Hittmair – Modified Robertson projection technique in nonequilibrium statistical mechanics.
410 J. Seke, G. Adam and O. Hittmair – Closed equations of motion for one- and two-particle expectation values in the case of spontaneous emission.
417 T. Kobayashi – Four–Higgs-doublet scheme in composite model for leptons, quarks and Higgs mesons.
421 A. Osman – A cluster expansion applicable to the three-body problem.
423 R. Balbinot and R. Bergamini – Quantum state for a black hole in a de Sitter universe.
429 E. Comay – Comments on the force exerted on electromagnetic sources.

N. 7 1 Dicembre 1985
pag.
433 E. Papp – Quasi-classical ground-state energies for equally mixed vectorial and scalar attractive power potentials.
437 M. A. F. Rosa and W. A. Rodrigues Jr. – Theory of the Michelson-Morley experiment in a gravitational field.
442 S. Marchetti, R. Simili and M. Giorgi – Line-tunable, high-efficiency, single-mode, mini-TEA CO_2 laser with corona preionization.
445 K.-E. Peiponen – A simple derivation of some sum rules for the power of the optical constants of insulators.
449 G. C. Joshi – Octonian unification and C, P and T symmetries.
455 M. Hayashi and K. Katsuura – Effects of anomalous ZWW coupling on $W^{\pm}$-production via Z^0-decay.
462 S. Dubnička and L. Martinovič – Inelastic $I = J = 1$ $\pi\pi$ scattering amplitude from data on $e^+e^- \to \pi^+\pi^-$.
467 Sang-Hoon Kim – The net force acting on relativistic electrons caused by net inverse bremsstrahlung in a plasma wave.
473 P. B. Burt and T. J. Pickett – Nonperturbative solution construction of nonlinear field equations.
477 F. Fusi, G. Agati and R. Pratesi – The role of ZZ-EZ isomerization in the photochemistry of bilirubin bound to human-serum albumina « in vitro ».

pag.
482 M. S. Abdalla – An alternative model of the damped harmonic oscillator.
487 P. Gravel et C. Gautbier – Dimensions cachées de courbure dans les théories de Kaluza-Klein.
491 A. Castellina, B. D'Ettorre Piazzoli, G. Mannocchi, P. Picchi, S. Vernetto, H. Bilokon and E. Meroni – The high-energy muon flux in air showers from Cygnus X-3.
497 D. Papadopoulos – Effects of a co-ordinate mapping on a particular class of static, axially symmetric solutions to the Einstein equations.
503 A. Cherubini and A. Ventura – Stopping of light ions in homogeneous electron gases.
510 W. A. Rodrigues Jr. – Lorentz-invariant clocks do not exist.
513 A. Caporali, F. Palutan, A. Cenci and S. Casotto – Polar motion and European baselines determined by analysis of satellite laser ranging data.
519 G. Cavalleri and S. Filippi – The cosmological red-shift can only be due to the Universe expansion and the Galaxies recession velocities are given by the nonrelativistic Doppler formula.
523 W. Fuss and G. Wirthumer – Light-quark masses and modified Uehling potential in heavy quarkonia.
528 M. Surdin – EPR, ZPF and SED (Erratum).

N. 8 16 Dicembre 1985

pag.
529 A. Sym, O. Ragnisco, D. Levi and M. Bruschi – Soliton surfaces. - VII: Relativistic string in external field: general integral and particular solutions.
537 E. Infeld, P. Frycz and T. Czerwińska-Lenkowska – Dynamics of nonlinear ion-acoustic waves in an external magnetic field.
544 M. Halilsoy – Scalar plane waves in general relativity.
547 Y. Funatake, Y. Sakamoto and F. M. Toyama – Pion interaction with ^{12}C at 800 MeV/c.
552 M. Bacci – A seeming exception to the Jahn-Teller effect.
555 I. Consoni, Y. Nogami and A. B. Volkov – Nonrelativistic simulation of Dirac's bag.
560 T. Suzuki – Classical and quantal frictions.
563 A. Palumbo – Lunar tidal triggering in volcanic areas.
569 S. Fajfer and R. J. Oakes – Model dependence of twist-four spin-two correction to $\sin^2\theta_w$ determined in neutral-current neutrino scattering.
573 S. Petracca and I. Pinto – Volterra series solution of particle De-Bunching equation.
579 J.-P. Lebrun – On the solution of the Schwinger-Dyson equation in the presence of spontaneous symmetry breaking.
584 M. Hatzis – The η_b isoscalar mixing in broken SU_5.
587 E. Recami – The Tolman-Regge *antitelephone* paradox: its solution by tachyon mechanics.
594 M. Saleem and Fazal-e-Aleem – Amplitude analysis for $\pi^- p \to \pi^0 n$ scattering and pole plus cut model.
599 R. S. Antola and J. A. Ferrari – About the slowing-down of accelerated clocks.
601 I. L. Buchbinder and S. D. Odintsov – Asymptotical behaviour of the effective potential in an external gravitational field.
607 C. Massa – Ferretti's limit and Sakharov's temperature.

pag.
609 C. Massa – Maximal and minimal acceleration in quantum mechanics and in cosmic quantum mechanics.
612 G. Papini and M. Weiss – Bulk viscosity and the inflationary Universe.
617 T. Sjödin and F. Heylighen – Tachyons imply the existence of a priviledged frame.
624 A. B. Bell and D. M. Bell – Comparison of four orbit equations.
629 M. DerSarkissian – Possible evidence for gravitational Bohr orbits in double galaxies.
637 L. H. Reis – A model of the Universe. - I: The theory of chaotons.

N. 8 A 16 Dicembre 1985
pag.
641 E. Conte – Investigation on the chirality of electrons from ^{90}Sr-^{90}Y beta-decay and their asymmetrical interactions with D- and L-analines.
648 G. Cortini, R. Masullo and S. Schacherl – Nonexponential pendulum damping.
651 Y. Minorikawa and K. Mitsui – Estimation of prompt cosmic-ray muon flux at high energies.
658 P. Trivero – Observation of internal waves and seismic waves in the Sicilian channel.
665 D. Leiter – Can the master time asymmetry in nature be electrodynamic in origin?
671 C. Massa – Remarks on DerSarkissian's cosmic quantum mechanics.
678 G. Mastrocinque and M. Foresti – Threshold behaviour of different collisional models for vibration-translation energy transfers in gases.
683 R. T. Bush – The de Broglie wave derivation for material diffraction re-examined: a re-derivation without matter waves.
687 Y. Gauthier – A note on Zeno's paradox in QM.
689 H. Aspden – Unification of gravitational and electrodynamic potential based on classical action-at-a-distance theory.
694 C. Massa – Maximal acceleration hypothesis and cosmological constraints on particle masses.
697 M. H. Mac Gregor – A dynamical basis for the de Broglie phase wave.
705 H. Aspden – The paradox of constant planetary mass as evidence of a leptonic lattice-structured vacuum state.
711 Indici del Volume 44, Serie 2, 1985
